EDUCATION

Lassonde School of Engineering, York University
Bachelor of Science (Honours) in Computer Science

Expected Graduation: Dec 2026
GPA: 3.6

PROFESSIONAL EXPERIENCE

- Maple Leaf Sports and Entertainment (MLSE)** May 2024 – June 2025
Software & Data Engineer Intern Toronto, ON
- Collaborated with a team of data scientists and engineers in building a [conversational video agent](#) utilizing **AWS**, [Twelve Labs](#) and [LangGraph](#), enabling users to search through hundreds of hours of footage in seconds and automate editing workflows
 - Designed and deployed **AI-powered internal tools** that streamlined workflows and reduced task completion time
 - Supported **DevOps** and software engineering teams in containerizing applications, setting up **OAuth** and deploying them on the company's **AWS EKS** infrastructure, supporting **10+ production services with high availability**
 - Team responsible for winning the [2025 NBA Team Innovation Award](#) and the [2025 CIO Canada Award](#)

ENTREPRENEURIAL EXPERIENCE

- Founder, Northscore** Jan 2026 - Present
- Drive 100% of technical strategy and execution for **Northscore**, architecting **containerized microservices** to scale a platform covering **50+ leagues across high school, college, semi-pro, and professional sports**
 - Deliver a high-performance **progressive web app** with live stats, recommended content, push notifications, and installable app features, achieving **99.9% uptime** and optimized for **sub-second API latency**
 - Build the [Northscore Stats API](#) and data infrastructure with **automated multi-source pipelines**, delivering **near-real-time stats for 50+ leagues and 1,000+ teams** across Canadian sports
 - Maintain production **observability** with Pydantic Logfire, and Vercel for **end-to-end logging, tracing, and metrics**
 - Develop [Northscore MCP server](#), enabling AI tools and interactive apps to query Canadian league data

PROJECTS

- [Canada Basketball AI Scouting System](#) | *FastAPI, React, LangGraph, SQLite, PostgreSQL, Docker, Google Cloud, Gemini, Cohere*
- Built a scouting system, integrating multi-league data (U SPORTS, CCAA, HoopQueens, CEBL) into a searchable stats page and a **conversational AI agent** that generates detailed, evidence-based player scouting reports.
- [Canadian sports data SDKs](#) | *Python, Pandas, BeautifulSoup, Pytest, Pylint, requests, httpx, GitHub Actions*
- Developed and open-sourced **Python SDKs** for [U SPORTS](#), [CFL](#), and [CEBL](#) to retrieve and structure sports data, integrating it into data pipelines, applications (e.g. Northscore), and data visualizations
- [mplbasketball](#) | *Python, Matplotlib, Pytest, Pylint*
- **Open-source contributor and maintainer** of a **Python** library for visualizing 2D and 3D spatio-temporal basketball data from major competitions, including the NBA, WNBA, NCAA, and FIBA, resolving issues and reviewing pull requests
- [BookBuddy](#) | *Java, Spring Boot, Maven, React, Vite, TypeScript, Tailwind CSS, SQLite, PostgreSQL, Open Library API*
- Built a personal reading tracker app to organize books, track progress, and achieve reading goals

EXTRA-CURRICULAR

- Vice President - York Sports Analytics Club
York University Toronto, ON Aug 2025 – Present
- Leading all technical projects, external partnerships with sports organizations and managing the club's digital infrastructure
 - Led the development of the [Ontario University Sports Analytics Coalition](#) website and co-organized the 2026 conference

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript, TypeScript, HTML5, CSS (Tailwind), SQL, Bash
Developer Tools: Git, GitHub, Docker, Kubernetes, Redis, Supabase, AWS, Google Cloud, OpenTelemetry, Claude Code
Frameworks/Libraries: FastAPI, SQLAlchemy, Spring Boot, Express.js, Playwright, Node.js, React.js, Next.js, LangGraph
