EDUCATION

Lassonde School of Engineering, York University — **Expected Graduation: Spring 2027**
Bachelor of Science (Honours) in Computer Science — GPA: 3.5

PROFESSIONAL EXPERIENCE

Genesys — May 2026 – June 2027
Software Developer Intern — Toronto, ON

- Build and ship backend features and fix bugs across high-traffic, event-driven **Spring Boot microservices** (REST APIs and Kafka producers/consumers) and **Airflow pipelines**, with unit and integration tests
- Maintain **AWS** infrastructure with **CloudFormation and Terraform**, fix SRE audit findings, and improve monitoring with **OpenTelemetry**, CloudWatch, **New Relic**, and **Sumo Logic**

Maple Leaf Sports and Entertainment (MLSE) — May 2024 – June 2025
Software & Data Engineer Intern — Toronto, ON

- Collaborated with a team of data scientists and engineers in building a multimodal AI agent utilizing **AWS**, Twelve Labs and **LangGraph**, enabling users to search through hundreds of hours of footage in seconds and automate editing workflows
- Designed and deployed **AI-powered internal tools** that streamlined workflows and reduced task completion time
- Supported **DevOps** and software engineering teams in containerizing applications, setting up **OAuth** and deploying them on the company's **AWS EKS** infrastructure, supporting **10+ production services with high availability**
- Team responsible for winning the **2025 NBA Team Innovation Award** and the **2025 CIO Awards Canada**

ENTREPRENEURIAL EXPERIENCE

Founder, Northscore — Jan 2026 - Present

- Drive 100% of technical strategy and execution, architecting **containerized microservices** and **CI/CD pipelines** for a progressive web app platform covering 80+ sports leagues, achieving **99.99% uptime** and **sub-second API latency**
- Built the **Northscore Stats API** and automated multi-source data pipelines, serving **near–real-time stats** for 80+ leagues and 1500+ teams across Canadian sports
- Maintain production observability with **OpenTelemetry** and Vercel insights for end-to-end logging, tracing, and metrics

PROJECTS

Canada Basketball AI Scouting System | *FastAPI, React, LangGraph, SQLite, PostgreSQL, Docker, Google Cloud, Gemini, Cohere*

- Built a scouting system, integrating multi-league basketball data into a searchable stats page and **a conversational AI agent** that generates detailed, evidence-based player scouting reports.

Canadian Football League Data SDK | *Python, Pandas, BeautifulSoup, Pytest, Pylint, requests, httpx. GitHub Actions*

- Developed and **open-sourced a Python SDK** for the **CFL** API, standardizing data for pipelines and analytics

mplbasketball | *Python, Matplotlib, Pytest, Pylint*

- **Open-source contributor and maintainer** of a Python library for visualizing 2D and 3D spatio-temporal basketball data from major competitions, including the NBA, WNBA, NCAA, and FIBA, resolving issues and reviewing pull requests

EXTRA-CURRICULAR

Vice President - York Sports Analytics Club, York University — Aug 2025 – Present

- Leading all technical projects, external partnerships with sports organizations and managing the club's digital infrastructure
- Led the development of the **Ontario University Sports Analytics Coalition** website and co-organized the 2026 conference

TECHNICAL SKILLS

Languages: Python, Java, Go, SQL, JavaScript, TypeScript, Bash
Developer Tools: Git, Docker, AWS, Google Cloud, Kafka, Airflow, Spark, Iceberg, Terraform, OpenTelemetry, New Relic
Frameworks/Libraries: Spring Boot, FastAPI, SQLAlchemy, JUnit, Pytest, Node.js, Next.js
